Re: Flu Shot Coverage

The flu, influenza, is a contagious disease that leaves many people temporarily unable to work and function each year. Because it is possible to spread the flu even before you start to feel sick, the most effective way to prevent the flu to date is to be immunized. This year's flu immunization will cover three strains of the influenza virus and many pharmacies are equipped to administer the flu immunization in their store.

The Plan Trustees have accepted an arrangement through Sav-Rx to coordinate influenza vaccinations for Plan participants this fall. Sav-Rx was able to contract with most major pharmacy chains for Plan participants to receive the standard influenza Injectable vaccination at a special reduced rate.

The Plan will assume the entire cost of the immunization.

To take advantage of this offer, simply visit a pharmacy in the Sav-Rx network that administers flu shots and present your Sav-Rx identification card. You will not be required to make any co-payment and the cost of the shot will be billed to the Fund.

You are encouraged to take the time to get your annual flu shot as soon as possible.
